

## GREY COMES HERE ON PEACE MISSION

Former English State Secretary Accepts Appointment

### TO WIND UP TREATY

Remaining Questions to Be Determined on His Arrival.

HE WILL STAY TEMPORARILY

A Permanent Ambassador to Be Named Early in Coming Year.

LONDON, August 13.—Viscount Grey, former British secretary of state for foreign affairs, has agreed to represent the British government at Washington, pending the appointment of a permanent ambassador.

Lord Grey is consenting to go to Washington temporarily. Andrew Bonar Law, government spokesman said in the house of commons today, in order to deal particularly with questions arising out of the peace settlement.

Mr. Bonar Law added that a permanent ambassador to the United States would be appointed early next year.

Viscount Grey of Fallodon (Sir Edward Grey) comes to the United States to represent the British government after a brilliant career as head of the British foreign office. For many years he was the political affairs of Europe, he was secretary of state for foreign affairs from Dec. 11, 1905 to Dec. 11, 1916.

On several occasions during that period it was the initiative of Sir Edward Grey that caused the gathering clouds of war to disappear. It was he who made the last effort to prevent the European war when he urged the ambassadors of the leading powers to meet and discuss the situation in an attempt to put off hostilities. His effort failed through the attitude of the German government and the German emperor.

The ambassadorial post at Washington has been vacant since the departure last spring of the Earl of Reading who has resumed his office as lord chief justice of England.

A liberal in politics, Viscount Grey sat in the house of commons from 1885 to 1916 as the representative of the Berwick-on-Tweed division of Northumberland. From 1892 to 1916 he was undersecretary of state for foreign affairs under the Earl of Rosebery. His first position after leaving Oxford was as private secretary to Sir E. Baring, later the Earl of Cromer.

The new British representative was born April 28, 1863, and succeeded to the baronetcy on the death of his grandfather in 1882, his father, Capt. George Henry Grey, having died previously. In 1912 while still Sir Edward Grey he received the decoration of Knight of the Garter, the first commoner to be so honored in many years.

Viscount Grey has always supported the idea of a league of nations.

WASHINGTON, Aug. 13.—Questions arising out of the peace settlement which Bonar Law announced in the house of commons today would require the attention of the new British ambassador to the United States. He understood here to include a readjustment of the complicated financial relations between Great Britain and the United States growing out of loans and credits advanced by America.

There also must be an almost immediate recasting of many existing treaties between the two countries, especially those relating to trade following the war. Many of those conventions date back for more than a century and were said by officials to have been applied to modern conditions only by the exercise of the greatest liberality of construction. The La Follette shipping law swept away completely one treaty relating to the rights and duties of sailors and port authorities, and this never has been replaced.

In the early days of the war there were many issues between the state department and the British foreign office growing out of interference with American commerce by British warships and British orders and merchants pending when the United States entered the war, still technically open. Earl Grey was the British secretary for foreign affairs when these issues arose and conducted the negotiations for his government.

There has been a suggestion, too, that conditions in Mexico were such as to demand consideration of an international basis in view of the large interests of foreign investors and especially British in that country. For a number of years the British government has refrained from exacting demands upon Mexico for reparation for the killing of British subjects and for pecuniary losses inflicted upon British individuals, preferring to leave to the United States the adoption of measures to meet these conditions. It is believed now that one of the first duties of Viscount Grey will be to attend the plenipotentiary settlement of the British issues with the Mexican government after reaching a satisfactory understanding with the American state department.

## Salvaging Submarine Invented to Recover Riches From Sea Bottom

## OIL LEASE MEASURE IS BEFORE SENATE

Committee Favorably Reports Bill for Government-Owned Mineral Lands; Like Former Bills.

### WOULD STIMULATE OUTPUT

Increased Production Is Purpose of New Bill—Provisions Are Made Public at Capitol.

WASHINGTON, Aug. 13.—Favorable report on the bill for leasing of government-owned oil, coal, potash and iron lands for the purpose of stimulating production was ordered today by the Senate committee.

The vote was unanimous. The bill virtually is the same as that passed by the House, but the conference committee which failed to agree on the Senate bill did not adopt the conference report.

Under the bill an oil prospector could receive title in one-fourth of the land acres allotted him under his prospecting permit at a fixed royalty of 5 per cent, and a perfect right to lease other three-fourths of the land to another oil producer, the latter of the interest, but at no more than one-eighth of gross production.

Oil land within production fields would be leased in plots of 640 acres at a royalty of not less than one-eighth or more than one-fourth of the oil produced. Leases of these lands would be for competitive bidding, however.

Prospectors would be able to lease a maximum of 2,500 acres of coal land on a basis of from five to 10 cents a ton, but provisions authorizing the sale of coal lands was eliminated. Alaskan coal land is not affected.

Leasing of oil and coal land by means of powerful engines or raised by means of powerful engines from the bottom of the sea would be prohibited.

Mr. Lake, who has been in the business of salvaging wrecks, is the inventor of what for a better name might be called a salvaging submarine. The submarine really consists of two boats, one the mother ship and the other a submarine attachment or tube which can be lowered

into the water and raised by means of powerful engines or raised by means of powerful engines from the bottom of the sea. Ships and cargo lost during the war was successfully demonstrated recently off the coast near Bridgeport Harbor, Conn. Mr. Lake is the inventor of what for a better name might be called a salvaging submarine. The submarine really consists of two boats, one the mother ship and the other a submarine attachment or tube which can be lowered

## TRANSATLANTIC AIR SERVICE IN 3 YEARS

American Buys English Engines and Planes for Aerial Trunk Lines in the United States.

LONDON, Aug. 13.—"There will be a trans-Atlantic airplane service with one stop at the Azores within three years and the trip will be made in 48 hours from England."

This prediction was made today by P. G. Diffin, president of the Aeroplane and Motor Corporation of New York city, just before he left for home on the Baltic today.

Mr. Diffin has been in conference here for three weeks with British aircraft manufacturers, placing orders for 800 aero engines and 100 planes which will be used in the development of aerial trunk lines in the United States.

The first of these trunk lines, between New York and Chicago, will be used for merchandise and is expected to be in operation within a year. Mr. Diffin said that no thought would be given to passenger traffic until the freight line was established and in running order.

Radiating from the New York-Chicago trunk line will be branch lines

WOMAN SUFFERS TORMENTS OF CONDEMNED

Without mentioning names or quoting from the letters of those who write about the terrible suffering that they have undergone, think of the countless thousands of suffering women in America alone and you will realize that woman suffers the torments of the condemned. Why is it that women, who, as young girls, were healthy, robust, athletic specimens of strength and vigor, a few years later become physical wrecks?

Sixty-nine times out of hundred this rapid decline of physical health and energy is not due to any disease or organic disorder, that is peculiar to women alone. Ninety-nine times out of hundred the cause of the rapid decline of your women's strength is the neglect of Acid Stomach, and the pity of it is that practically all the misery, agony and loss of health and vitality that these millions of women endure could be avoided if only people would realize what a frightfully dangerous condition Acid Stomach is and how certain and sure it is if neglected, to make its victims suffer the torments of the condemned.

Because the first symptom of Acid Stomach seems trifling, nothing is done. There is a little belching of gas and a sense of aches in the stomach, a loss of appetite, bad breath, bodily complexion with now and then a sense of dizziness with specks that seem to float before the eyes, but the victim is not alarmed. Then follows a general sense of exhaustion, which allows great accumulated weariness of the body, and after a period of undigested food, the victim begins to feel the system causing dyspepsia, biliousness and a complete breakdown, resulting in loss of weight, loss of appetite, loss of energy, the most horrible mental depression, languor and after that, exercising a spoiling action that brings the weak out on the forehead in great heads while the hands and feet grow cold and clammy. This is the result of acid in the system, as a tag and for ten weeks and perhaps in battle with life's problems or take any one in the joy of existence.
